As research cultures and publication rates vary significantly across academic disciplines, the QS World University Rankings by Subject applies a different weighting of the 4 indicators below, depending on the subject areas.

- (1) Academic reputation
- (2) Employer reputation
- (3) Research citations per paper
- (4) H-Index

Survey drawn on responses from 75,015 academics worldwide.
 QS draws on 40,455 survey responses from employers worldwide.
 Number of citations per paper
 The h-index measures both productivity and impact of publication.
