Organized by:

RISKCHANGES

An open-source tool for multi-hazard risk assessment and decision making

@ Understanding Risk Forum 2020

This session will provide an advanced approach for multi-hazard risk assessment revealing how risk changes over time, and how the information on changing risks can be used for disaster risk management. Furthermore, we will also talk about the RiskChanges platform that we are developing, which allows the end-users and stakeholders to assess and evaluate the prevailing risks in a designated area and decide the best available risk reduction alternatives.

SPEAKERS

Dr. Manzul Kumar Hazarika
 Director, Geoinformatics Center
 Asian Institute of Technology

Prof. Cees van Westen
 Department of Earth Systems Analysis
 ITC- University of Twente

Mr. Ashok Dahal
 Developer and M.Sc. Student
 ITC- University of Twente
