

# NEW FLEXIBLE DEGREE OPTIONS

AIT

APPLY NOW

## ABOUT THE PROGRAM

The "Flexible Degree Options" is a new alternative to our traditional "On-campus Master or PhD Option" to conduct Master or PhD studies at AIT. It is applicable to selected programs at the Asian Institute of Technology (AIT). Students will receive the same degree and the same academic requirements apply as the program offered in our regular "On-campus Option". Students are allowed to do almost all coursework online via AIT's Hybrid Mode of Instruction (Certain programs may require a lab on campus). Alternative to the online option, If the student wishes, he/she can also attend the physical classes at AIT campus.

## HOW IT WORKS

Typically, the 1<sup>st</sup> Year is online via AIT's Hybrid Instruction. Students may spread coursework over more than one year. Students take the same course offered to on-campus students via Hybrid Mode. All classes are recorded for later viewing.

After completion of the coursework, students can do their research or thesis in the AIT Campus at a flexible time. In coordination with the Program Chair, students may come to campus in blocks or up to 11 months, typically for thesis research work.

**Total flexible time to complete the Masters program is 4 years and PhD program is 6 years.**
