The China Collection

A bridge to research from China

ScienceDirect makes scientific research from China accessible to your users

Although China is the world's fastest progressing country in its development of science, technical and medical research, barriers such as language have, until recently, prevented much of its research from being disseminated to the wider academic world. Research from China reflects scientific approaches untested in Western countries, and that benefits from substantial funding, has previously to a large extent, been invisible to the global scientific community. Approximately 75% of Chinese research output is never consulted outside of its country of origin. Now ranking fifth in the world in the number of published papers, Chinese research journals are an increasingly significant literature resource.

Thanks to cooperation between Elsevier, leading Chinese scientific institutes and societies, research findings from China are now available online via ScienceDirect.

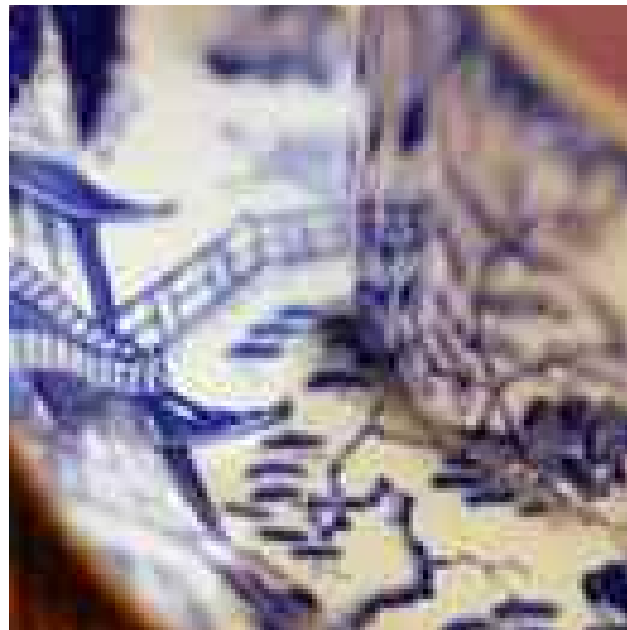

Introducing the ScienceDirect China Collection

Representing broad coverage of key scientific areas, the ScienceDirect China Collection is a series of prestigious journals never before disseminated outside of China. The first 20 journals were launched on ScienceDirect in early 2006. The Collection will continue to grow over the years to form a rich and unique resource on ScienceDirect. The ScienceDirect China Collection offers your users:

- Access to established society journals covering the expanding field of Chinese research.
- Insight into practices and methodologies rarely used elsewhere.
- Perspectives on the increasingly influential Chinese research, enhancing your users' understanding of their field.

The China Collection delivers a range of high quality journals, publishing diverse topics of current global scientific interest, such as

- Cell genetics, by researchers at the respected Institute of Biotechnology, Beijing, Academy of Military Medical Sciences, Beijing and

the Medical University, Chongqing.

- Nano-manipulation of single DNA molecules, resulting from collaboration between the Shanghai Institute of Applied Physics, the Chinese Academy of Sciences, Shanghai and the Bio-X Life Science Research Center, Shanghai Jiaotong University.
- A China-specific soil study in Paddy fields in subtropical China, resulting from an international partnership between the Chinese Academy of Sciences, Mississippi State University, USA and Justus-Liebig-University, Germany.

Available outside China for the first time

The majority of the journals in the ScienceDirect China Collection are published in English. The remainder is translated into English. Through Elsevier's Chinese Journal Cooperation Program, the editorial boards of these journals are supported, and staff given additional editorial training and advice. The provision of this collection means that your users can benefit from research from China available to them for the first time, from their desktop.

Fully integrated and linked on the leading ScienceDirect platform

This rich resource of Chinese literature is available online via ScienceDirect, fully linked with more than 7 million full-text articles and a growing range of authoritative books. A unique collection of global research is now integrated online, so you and your users can benefit from:

- A comprehensive online collection accessible on a single platform.
- Fully searchable and linked articles.
- Intuitive and advanced search functions to make it fast and easy to locate articles.
- Full reference linking to track the influence of research across time, geography and disciplines.
- Personalized alerting features to help users be more efficient.
- Elsevier is a founder and the largest participant in CrossRef, a cross-industry initiative that allows ScienceDirect users to link directly from citations to referenced articles on other platforms.

Covering a broad range of science

This unique collection of journals represented in the ScienceDirect China Collection are drawn from a broad range of scientific areas. Your users will benefit from coverage of:

- Agricultural Sciences
- Bionics
- Biotechnology
- Chemical Engineering
- Chemistry
- Earth Sciences
- Ecology
- Engineering
- Environmental Sciences
- General Medicine
- Genetics
- Genomics, Proteomics and Bioinformatics
- Materials Science
- Mathematics
- Nephrology
- Nuclear Science
- Obstetrics and Gynecology

- Occupational Therapy
- Physiotherapy
- Surgery

Now ranking fifth in the world in the number of published papers, Chinese research journals are an increasingly significant literature resource.

Ordering information

From 2007 onwards, you can subscribe to the ScienceDirect China Collection.

- Full title lists are available on www.info.sciencedirect.com/china
- You can subscribe to a single title or benefit from a discounted rate for access to the Collection.

For more information, please visit www.info.sciencedirect.com/china or contact your nearest Elsevier Regional Sales Office.

Special offer!

A unique introduction to a unique collection

All ScienceDirect subscribers and guest users will benefit from full access to the ScienceDirect China Collection titles at no charge until 31 December 2006.

Strengthen your library's important research resource by taking advantage of this special offer to introduce the ScienceDirect China Collection.

Encourage your users to explore this new research resource, by taking advantage of this offer.
